## **Claims**

## I claim:

1. A wheel chair accessible crib permitting access by a wheel chair bound care giver, the wheel chair having a conventional maximum width and seat height, said crib comprising

a) at least two end supports spaced by a width greater than the maximum width of the

- b) a central bed extending between said at least two end supports, said central bed portion having a lowermost extent which exceeds the seat height of the wheel chair by an amount sufficient to accommodate a lap of the care giver;
- c) two side frame members for restraining an infant;

wheel chair;

- d) at least one of said side frame members having at least one access door which pivots out of the way in a manner to permit said wheel chair bound care giver to access the infant without interfering with the approach of the wheel chair.
- The wheel chair accessible crib of Claim 1 wherein said at least one access door
  comprises at least one bi-fold door which retracts to provide access to the infant without
  requiring the wheel chair bound care giver to back away from the crib to permit said door
  to clear.
- 3. The wheel chair accessible crib of Claim 2 wherein said at least one access door comprises a pair of bi-fold doors which retract in opposite lateral directions.
